DETAILED ACTION

Information Disclosure Statement

The information disclosure statements submitted on 7/09/2004 and 11/01/2006 have been reviewed. Copies of the respective statements including the Examiner's notation are attached for the Applicant's records.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims **3-4**, is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim **4** line 15 and claim **3** line 19 recites the limitation "the one or more" in line 15. There is insufficient antecedent basis for this limitation in the claim.

For the purpose examination this limitation has been interpreted as "the one or more related matches" as set forth in Claim 1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 through 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakagawa et al (US 6,168,519).

Nakagawa teaches game including:

a virtual start time determination means for deciding the virtual start time of a plurality of matches (Figure 2, Col 13:46-52);

a related match selection means for selecting a match from the plurality of matches based the match virtual start time and the relation of a main match start time (Col 13:29-40);

match simulation means for simulating a match (Figure 13);

event time arrival monitoring means for recognizing the arrival of an event time during the execution of a match (Element ST670, Figure 13, Col 14:49-55);

an event content outputting means for outputting event content at the event time during the execution of the main match (Element ST680, Figure 13, Col 14:49-55);

event replay data for reproducing and displaying events occurring in a match as event content (Element ST690, Figure 13, Col 14:49-55);
